Lactones and Fumarates

Nordmann Fine Chemicals key intermediate series.

Now offering both Fumaryl Chloride & β -Propiolactone.

Fumaryl Chloride is a widely used acid halide building block which is commonplace in many pharmaceutical and agrochemical syntheses. It is also used in dye production for the textile industry and in some polymerisation chemistries.

β -Propiolactone is becoming more and more common as a building block in organic synthesis as it becomes more available in the market. It found widespread use initially as a sterilizing and sporicidal agent for medical and veterinary applications.
